

# *Japanese Technology Made In India*

 **YOKOHAMA**

 **YOKOHAMA**  
*Earth-1*

# Benefits

The precision-designed tread patterns offer superior roadability on virtually any road surface

**Wide Straight Groove**  
Four straight grooves control hydroplaning on wet roads for improved safety and performance.

Sidewalls are reinforced to stand up to the rigors of driving on rough roads - and the occasional bump on the kerbstone

**Bold Side Bar Design**  
The bold side bar protects the side of the tyre to reduce damage from kerbstone contact and other impact.

**Thicker Side Rubber**  
Thicker sidewall rubber boosts rigidity for extra protection from pinch cuts and other damage.

Construction may vary depending on the size

YOKOHAMA Earth-1's unique construction offers top levels of both durability and comfort

**Full Cover-Edge Cover**  
Tread portions are reinforced, ensuring durability on even the rough roads.

**2-ply construction**  
The 2-ply construction ensures higher stability. This improves the car's stability and enhances steering performance.

**Thicker Inner liner**  
The inner liner, developed specifically for YOKOHAMA Earth-1, more effectively controls air pressure, reducing problems caused by loss of pressure.

**Thicker Side Rubber**  
The bold side bar design and thicker sidewalls absorb impact such as kerbstone contact.

**High Bead Filler**  
YOKOHAMA Earth-1 uses higher-rigidity rubber compared to conventional tyres.

Construction may vary depending on the size

Optimised tread pattern and tyre construction reduce uncomfortable pattern and road noise

**Silent Sipe**  
Narrow grooves in the shoulder block control pattern noise echoing under the car body, ensuring a quieter ride.
